Turkey retail activity increases in volume since our last report. Although the overall feature rate rises slightly, Central and Western regions of the country reflect 40-50 percent increases in ad activity. Rotisserie breast are featured heavily the majority of outlets. Dark meat parts are mixed on price and volume with smoked products once again available after an absence of a few weeks. Ground products increase in activity but with that also comes a general rise in values. Extreme temperatures across the country appear to declining, hopefully consumers will soon return to normal consumption patterns.

All report information gathered from publicly available sources including store circulars, newspaper ads, and retailer websites.
